MAIN STRENGTHS

ISC® extended mode selector

Intelligent Slicing Control (JAC patent) is an automatic pressure and slicing speed control system. It adapts the cutting action according to the consistency of the bread. No manual setting needed. The ISC® with extended mode selector provides two extra automatic modes, to adapt to extreme cutting condition of very fresh breads or the need for particularly fast cutting rate.

Removable crumb collector

Accessible by tilting the front, cylinder-assisted door. 18 litre capacity.

Jacflaps

Holds the loaf together for easier handling when unloading.

Double slice thickness (option)

Allows two different slicing widths on the same machine

Foldable bag blower (option)

Saves packaging time.

Automode (option)

Automatic cutting cycle for optimum time management (JAC patent). Increased accessibility while maintaining an optimum safety level. Achieves maximum output combined with fewer operations.

BPA-free paint

100% BPA-free satin paint (Bisphenol A): safer for you, gentler on the planet. Its low-temperature curing process significantly reduces energy consumption. Available in three solid colours: white, black or grey.
