

# Varia<sup>pro</sup>

- ✓ Versatile
- ✓ Fast: Adjustable speed from 120 to 240 slices / minute
- ✓ Easy: Intuitive touch interface
- ✓ Design: Full stainless steel or painted steel finish
- ✓ Maximum safety
- ✓ Exemplary hygiene

## SPECIFICATIONS

Size of entry channel (L x W x H) in cm	46 x 34 x 16
Slice thickness in mm	Can be set from 5 to 25mm
Power supply	230V single-phase
Motor power in kW	0.75
Net weight (in kg)	230
Cleaning position	•
Manual claw	•
Blade type	Teflon-coated
GS certification	•

Finition

Options (Additional cost)

Clips box, Bag holder, Front bagger stand, Sourdough bread holder, Slice thickness display

## MAIN STRENGTHS

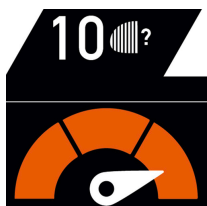

### Smooth and quiet for all breads

New engine generation designed for maximum precision on a wide range of breads, without lubrication. Soft start and stop function.

### Teflon coated circular blade

Developed to cut through a large variety of breads; from soft to dense, with a hard crust, and even sticky breads.

### Adjustable speed up to 240 slices/ minute

In order to reach the fastest possible speed for each bread type.

### Planetary blade drive

Fluid blade movement, avoids back-and-forth shakes. Robust solution for long-term mechanical reliability.

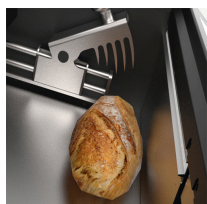

### Touch screen interface

Clear and simple interface, for an immediate and intuitive use.

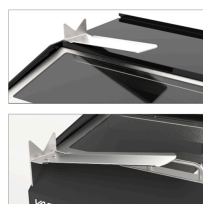

### Automatic grip (option)

Just place the bread and the machine does the rest while you continue to serve your customers.

### Manual grip

For all kinds of breads, including sharp ends. Allows to minimize last slice width.

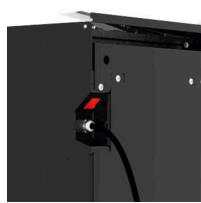

### Multi-positions adjustable bagging spade

Rotating spade, above cutting chamber, to optimize ergonomics and hygiene. Two standard (left and right) bagging spade positions. Or non-rotating front position (option).

#### Upper cover

Prevents objects placed on the machine (e.g. bags) to be pushed inadvertently behind the machine when opening the front cover. Rotates for easy cleaning.

#### Easy to access power switch

Accessible from the front of the machine, but not visible; avoids operations by a non-authorized person.

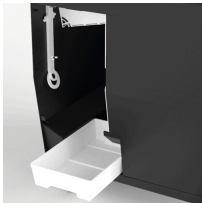

#### Maximum safety

Highest safety standards, for machine use by consumers and staff. The blade cannot run when the machine is not 100% locked.

#### Anti-pinch design

Users cannot inadvertently pinch their fingers in the front cover sliders.

#### Easy & fast cleaning

Internal architecture designed to channel bread crumbs to an easily accessible crumb tray. Flat surfaces (without recess around).

#### Bread slicer GS certified by TÜV

The GS certification (Geprüfte Sicherheit - "Safety Tested" in English) guarantees the safety of products and the protection of users' health. This highest level of certification ensures an absolute degree of safety for users.

#### BPA-free paint

100% BPA-free satin paint (Bisphenol A): safer for you, gentler on the planet. Its low-temperature curing process significantly reduces energy consumption. Available in three solid colours: white, black or grey.
